WOMEN'S WOES.

Maysville Women Are Finding Relief at Last.

It does seem that women have more than a fair share of the aches and pains that afflict humanity; they must "keep up," must attend to duties in spite of constantly aching backs, or headaches, dizzy spells, bearing-down pains; they must stoop over, when to stoop means torture. They must walk and bend and work with racking pains and many aches from kidney ills. Kidneys cause more suffering than any other organ of the body. Keep the kidneys well and health is easily maintained. Read of a remedy for kidneys only that helps and cures the kidneys and is indorsed by people in this locality.

Mrs. Rita Carson, Front street, Vanceburg, Ky., says:

"My kidneys were disordered for several years and I suffered from attacks of lumbago. My back ached intensely and the kidney secretions were profuse at times, while at others, scanty and distressing in passages. If I attempted to stoop, sharp twinges darted through my kidneys and often I became very weak. I finally began taking Doan's Kidney Pills and they proved of benefit in every way. I know of other persons who have used Doan's Kidney Pills with satisfactory results.

"ON TO CAIRO!"

The 9-Foot Stage in the Ohio River Now Assured in Next Ten Years

Dam No. 33 Finally Located Just Above Maysville—Will Cost a Million and a Half

Gigantic Scheme Made Certain Through Years of Earnest Work of Rivermen

The Government Engineers in charge of the preliminary and final surveys for the 9-foot stage of water in the Ohio river from Pittsburgh to Cairo, nearly 1,000 miles, now in winter quarters on the Maysville levee, snugly harbored behind the three immense cement ice piers, have practically finished the final drilling and surveys in the Ohio river at this point and have located "Dam No. 33" about three miles above the Maysville wharf at the foot of Market street.

The flotilla moored below the ice piers presents an imposing river spectacle, and the quarters are handsomely fitted up and quite snug for the sixty people employed when the weather permits. Junior Engineer Frank I. Loukes is in charge, who kindly gave THE LEDGER information in regard to the surveys, drilling, etc.

The boats are equipped with modern machinery for drilling in rocks, etc., to locate foundations for the locks and Dams. Mr. Loukes says operations are ended for the winter and that his crew will finish their work for the location of the Maysville Dam site in less than a week as soon as spring opens. Over forty of the men have been furloughed for the winter.

COST OF THE DAMS TABULATED.

Below are given the location and estimated cost of the fifty-four Dams needed to canalize the Ohio river. The small cost given for a number of the Dams indicates that they are now under construction and that the sum mentioned will be needed to complete the work. The list is as follows:

31—Portsmouth, O.	1,320,000				

The changes in the plans of Ohio river improvement from the proposed 6-foot stage to the 9-foot stage made necessary the re-location of all the Dams not contracted for or begun.

For instance, Dam No. 33, under the 6-foot stage, was located near Manchester, but under the 9-foot survey it is finally and definitely located a mile above the corporate limits of Maysville and nearly opposite Brooks' Bar, and 404 miles below Pittsburgh.

Dam No. 34, located at Dover under the 6-foot stage, will be built at Wellsburg, Ky., eleven miles below Dover.

This vast scheme of river improvement, which will cost, including past and future expenditures, nearly \$100,000,000, and make slack water navigation of a thousand miles of the busiest waterway in the world, is the united result of sixteen earnest years' work of hundreds of energetic rivermen. The scheme was conceived in 1894 in a Cincinnati boat store among a gathering of rivermen. These

In novels we find people as they ought to be, and people as they cannot be, but never as they are.
